

PROJECT SCOPE FORM

Project Title: Entry/exit system for the IIITB institute.

Project Number: 1746.

Project Leader/Manager: Puneeth K.

Sponsor: Admin.

Anticipated Project Start Date: 20-Aug-2018.

Date Prepared: 21-Aug-2018.

Estimated Completion Date: 23-Dec-2018.

Team Members:

1. Puneeth K
2. Student 1
3. Student 2
4. Student 3

Purpose of Project:

- To regulate the number of incomings and outgoings into the college.
- Details of every student , staff , management and outsiders is stored and documented which can be used in case of emergency.
- The attendance of the staff can be taken directly be taken.

Background:

- Most of the accidents are known to happen at late nights due to various reasons. So a restriction on going out after a specific time may decrease the chances of them happening.
- A number of outsiders are know to enter the college premises without proper reasons or details . This has to be controlled.

Deliverables:

- A detailed list of each student, staff and management's out going and incoming details.
- Staff's attendance can be calculated directly with the application without the need of any book.
- The decrease of unwanted entries and out goings can be treated as a measure of success.

Stakeholders:

- Admin

- Puneeth, Student 1, Student 2, Student 3.
- IIITB staff, IIITB management, IIITB students.

Resource Requirments:

- A Database system to store all the details of incoming and outgoing.
- Id cards must be added with a Bar code or QR code feature so that it will be easy to add the incoming or outgoing details. This is only for college students , staff and management.
- A server must be bought for once which can cleaned regularly so that it can be reused again to store the details.
- Security staff can be used as a responsible perrsonnel for updating the incoming or outgoing details.
